**Technical information**

**Metal** Non-toxic powder coating for interior use, with no heavy metals. Cured in an oven at 190°C, following degreasing and phosphating. Guaranteed minimum thickness of 50 microns. Minimum resistance to salt spray of 200 hours (in accordance with the ASTM B117 standard). Not suitable for direct contact with food as envisaged in Italian Ministerial Decree 21/03/73. Before the coating is added, it is possible to assess whether to give the products a special treatment to make them more resistant to wear and exposure to the elements. There is a surcharge for this treatment. Requests for other RAL finishes can be considered.

**Informazioni tecniche**

**Metallo** Verniciatura per interni a polveri atossiche prive di metalli pesanti, con passaggio in forno a 190 °C, previo trattamento di sgrassaggio e fosfatazione. Spessore minimo garantito 50 micron, resistenza minima in nebbia salina pari a 200 ore (norma ASTM B117). Non idonea al contatto diretto con gli alimenti come previsto dal decreto italiano D.M. 21/03/73. Prima della verniciatura, è possibile valutare l'applicazione di un trattamento al fine di rendere i prodotti più resistenti all'uso e all'esposizione agli agenti atmosferici. Per tale trattamento è prevista una maggiorazione di prezzo. Altre finiture RAL valutabili su richiesta.

**Technische Informationen**

**Metall** Die Lackierung der gift- und schwermetallfreien Pulverlacke für Innenbereiche erfolgt im Lackierofen bei 190 °C nach vorheriger Entfettung und Phosphatierung. Die garantierte Mindeststärke der Lack-schicht beträgt 50 Mikron bei einer Mindestprüfungsdauer von 200 Stunden im Salznebel (ASTM-Norm B117). Nicht für den direkten Kontakt mit Nahrungsmitteln geeignet, gemäß Ministerialdekret vom 21.03.1973 i.d.g.F. Vor der Lackierung kann die Anwendung einer Behandlung abgewägt werden, um die Produkte für den Gebrauch und gegen Witterungseinflüsse widerstandsfähiger zu machen. Für diese Behandlung ist ein Preisaufschlag vorgesehen. Auf Anfrage können andere RAL-Finishes in Betracht gezogen werden.

**The rationality of orthogonal lines and endless composition possibilities. Five heights and shelves in three lengths, on which back panels, sides and compartments can be arranged with tilt & turn or vertical opening doors, always inset in the frame.**

**Uprights** made of welded 35 x 35 mm (1.38" x 1.38") tubular metal in five heights and single depth of 36 cm (14.17"). The constant distance of the crosspieces allows the installation of the shelves with a constant useful pitch of 37.5 cm (14.76"). The tube guarantees great resistance and stability. Concealed adjustable feet.

**Shelves** in sheet metal box section with a thickness of 35 mm (1.38") in three widths (50, 100, 150 cm / 19.69"; 39.37"; 59.06") and a single depth of 36 cm (14.17"). The shelves are connected to the upright crosspieces for perfect continuity between two consecutive shelves, with no gaps or visible screws. This unique construction allows large load capacity.

**Back panels and sides** always inset in the frame. Built in sheet metal box section with a thickness of 35 mm (1.38").

**Door kit** push-pull, tilt & turn and vertical opening doors always inset in the frame. Sheet metal box section doors with a thickness of 20 mm (0.79"). Soft opening.

The product requires assembly.

**Razionalità delle linee ortogonali e infinite possibilità compositive. Cinque altezze e ripiani in tre lunghezze, sui quali poter disporre in libertà schienali, fianchi e vani con ante a ribalta e rialza, sempre in luce al telaio.**

**Spalle** in tubo saldato 35 x 35 mm (1.38" x 1.38") in cinque altezze ed unica profondità di 36 cm (14.17"). La distanza costante dei traversi permette il montaggio dei ripiani con un passo utile costante di 37.5 cm (14.76"). L'utilizzo del tubo garantisce grande resistenza e stabilità. Piedini invisibili regolabili.

**Ripiani** in sciolato di lamiera di spessore 35 mm (1.38") in tre larghezze (50, 100, 150 cm / 19.69", 39.37", 59.06") e unica profondità di 36 cm (14.17"). I ripiani, collegati ai traversi delle spalle, permettono di ottenere una perfetta continuità tra due ripiani consecutivi, senza alcuna fessura e senza viti in vista. La particolare costruzione permette grande capacità di carico.

**Schiene e fianchi** sempre in luce al telaio. Costruiti in sciolato di lamiera di spessore 35 mm (1.38").

**Kit ante push-pull** a rialza e ribalta sempre in luce al telaio. Ante in sciolato di lamiera di spessore 20 mm (0.79"). Apertura ammortizzata.

Il prodotto viene fornito smontato.

**Zweckmäßige orthogonale Linien und unzählige Kombinationsmöglichkeiten. Fünf Höhen und Einlegeböden in drei Längen, auf die – stets im Lichtmaß des Gestells – beliebig Rückwände, Seitenteile und Fächer mit Dreh-Kipp- und Hebe-Türen gesetzt werden können.**

**Pfosten** aus geschweißtem Metallrohr 35 x 35 mm (1.38" x 1.38") in fünf Höhen mit einem Tiefenmaß von 36 cm (14.17"). Die gleiche Entfernung zwischen den Streben erlaubt die Montage der Böden mit einem regelmäßigen Nutzabstand von 37.5 cm (14.76"). Die Verwendung des Metallrohrs gewährleistet hohe Strapazierfähigkeit und Stabilität. Regulierbare, unsichtbare Füße.

**Einlegeböden** aus Kastenblech, Stärke 35 mm (1.38") in drei Längen (50, 100, 150 cm / 19.69", 39.37", 59.06") und einem Tiefenmaß von 36 cm (14.17"). Die Einlegeböden, die mit den Streben der Pfosten verbunden sind, erlauben eine perfekt durchgehende Fläche zwischen zwei benachbarten Regalböden ohne jeden Spalt und ohne sichtbare Schrauben. Der besondere Aufbau ermöglicht eine hohe Belastbarkeit.

**Rückwände und Seitenteile** immer im Lichtmaß des Gestells aus Kastenblech mit einer Stärke von 35 mm (1.38").

**Set mit Dreh-Kipp und Hebe-Türen** im Lichtmaß des Gestells. Türen aus Kastenblech, Stärke 20 mm (0.79"). Gedämpfte Öffnung.

Das Produkt wird zerlegt geliefert.
