Technical information

Metal Non-toxic powder coating for interior use, with no heavy metals. Cured in an oven at 190°C, following degreasing and phosphating. Guaranteed minimum thickness of 50 microns. Minimum resistance to salt spray of 200 hours (in accordance with the ASTM B117 standard). Some finishes are suitable for direct contact with food as required by Italian Law Decree D.M. 21/03/73 and subsequent updates. Before the coating is added, it is possible to assess whether to give the products a special treatment to make them more resistant to wear and exposure to the elements. There is a surcharge for this treatment. Requests for other RAL finishes can be considered.

Wood Exquisite types of wood with veneers and under-leaf edges, on MDF structures. All panels are given an acrylic coating and are certified "formaldehyde free". Panck products are an exception because they are made with solid fir slats that are sanded and given a natural coating. Requests for other finishes for the wood will be considered.

Informazioni tecniche

Metallo Verniciatura per interni a polveri atossiche prive di metalli pesanti, con passaggio in forno a 190 °C, previo trattamento di sgrassaggio e fosfatazione. Spessore minimo garantito 50 micron, resistenza minima in nebbia salina pari a 200 ore (norma ASTM B117). Alcune finiture sono idonee al contatto diretto con alimenti come previsto dal decreto italiano D.M. 21/03/73 e successivi aggiornamenti. Prima della verniciatura, è possibile valutare l'applicazione di un trattamento al fine di rendere i prodotti più resistenti all'uso e all'esposizione agli agenti atmosferici. Per tale trattamento è prevista una maggiorazione di prezzo. Altre finiture RAL valutabili su richiesta.

Legno Pregiate essenze di legno impiallacciato con bordatura sottofoglia, su struttura in MDF. Tutti i pannelli ricevono una verniciatura acrilica e sono certificati "privi di formaldeide". Il prodotto Panck è un'eccezione in quanto è composto da doghe in massello di abete levigato e verniciato al naturale. Altre finiture in legno sono valutabili su richiesta.

Technische Informationen

Metall Die Pulverbeschichtung der gift- und schwermetalldfreien Pulverlacke für Innenbereiche erfolgt im Lackierofen bei 190 °C nach vorheriger Entfettung und Phosphatierung. Die garantierte Mindeststärke der Lackschicht beträgt 50 Mikron bei einer Mindestprüfungsdauer von 200 Stunden im Salznebel (ASTM-Norm B117). Einige Oberflächen sind für den direkten Kontakt mit Lebensmitteln geeignet, wie in der Verordnung vorgesehen Italienisch D.M. 21/03/73 und folgende Aktualisierungen. Vor der Pulverbeschichtung kann die Anwendung einer Behandlung abgewägt werden, um die Produkte für den Gebrauch und gegen Witterungseinflüsse widerstandsfähiger zu machen. Für diese Behandlung ist ein Preisaufschlag vorgesehen. Auf Anfrage können andere RAL-Finishes in Betracht gezogen werden.

Holz Hochwertiges Holzurnier mit folienbedeckter Umrandung auf einer Struktur aus MDF Alle Paneele erhalten eine Acryl-Lackierung und sind formaldehydfrei zertifiziert. Eine Ausnahme bildet das Produkt Panck, denn es besteht aus Holzplatten aus massivem, poliertem und natürlich lackiertem Fichtenholz. Andere Holzfinishes können auf Anfrage abgewägt werden.

Drawer units and cabinets with distinctive handle grips which not only serve a simple practical purpose but also add aesthetic appeal.

One-piece bodies made of bent sheet metal with a thickness of 0.7 mm (0.03") and an uninterrupted 14 mm (0.55") edge throughout the collection.
